

Gold Calling® Announcement - September 1st, 2008

Effective September 1st, 2008, the sole principal of Gold Calling®, Mr. Steven Burke, is pleased to announce that a new joint venture - using this registered trademark - has been formed between his company and for the purpose of forwarding GREEN technology to industry, which will have the dual benefit of both reducing industry overhead and saving the planet.

NewBiz4u.net have an excellent reputation; the world's leading outsourced PROSPECTING firm - they "open the door to new business". In the past decade this company is responsible for many success stories, including connecting ActivPlant, formerly their client, with Toyota. "The latter now uses ActivPlant's manufacturing intelligence software to run all of their car manufacturing facilities worldwide

Steven is also the principal founder of a software technology known as Success on Contact®, which - amongst other things - updates the client's database automatically and remotely. "When a prospect shows interest in their Green technology our system keeps our client's database up to date real time, which has a number of advantages."

Steven Burke developed Success on Contact® to prevent loss of valuable data. "Whenever a company hires a sales rep, who needs to use a known contact manager type of software, they can too easily take the company's database with them to a competitor, this happens daily."

"With our system, there is no EXPORT feature and there doesn't have to be, the data is backed up automatically. We just turn off any user's software on their computer the moment they 'walk'. And, because the software updates the employer of the changes as they are made, the employer has a real time copy of their database at all times, they can never lose data when a sales rep is fired or quits or a hard drive fails."

"That is why we joined forces with NewBiz4u.net. As they develop prospective clients for the businesses looking to sell their GREEN technology to industry, that prospect's info is sent through instantly. Thus, the ultimate client needs to make no manual effort to receive the data and the value of the prospecting effort they are paying for!"

GOLD CALLING®.COM

Your future is on the line.

"We also believe that many developers of technology are not sales professionals. They lack the experience to get their great ideas to market, thus the association with <http://NewBiz4u.net> under the trademark Gold Calling® with the use of the Success on Contact® database technology."

"We provide the data, the fully automated data delivery system, the actual sales know-how and make the sales calls, all the technologist needs to do come up with the inventions the planet and industry needs, we do the rest!"

"We were tired of using our sales and marketing prowess to promote products that hurt the environment, now we are pleased to adopt a GREEN focus. From now on, everything we do will also help the environment, as it helps our clients realize their dreams too!"
